

Instructions

Instructions for printing the cards

It is VERY IMPORTANT to select LONG-EDGE (sometimes referred to as LEFT BIND) (i.e., not short-edge, not top bind) while setting double-sided printing in the printer dialogue box.

This is crucial to ensure that the back faces of the cards will match their corresponding front faces.

The set of cards was designed to be printed in A3 size, so that each card can fit a typical cell in an educational robot mat. Still, users might find that other sizes (e.g. A4) are also appropriate for their purposes.

Instructions for printing the manual

For users who need to print the manual and choose double-sided printing, setting the printer to bind on the short edge is recommended. This prevents the pages from being upside-down when flipped.
